

Memo: PM-2026-14

To: All support agents and supervisors

From: Director of Customer Support

Date: September 18, 2026

Account PIN length changes from 4 to 6 digits

Effective October 1, 2026, every account PIN used for phone verification must have 6 digits. Four-digit PINs stop working on that date.

What agents must do on calls from October 1:

1. If a caller gives a 4-digit PIN, do not accept it as a verification factor. Use two other factors instead.
2. Tell the caller to set a new 6-digit PIN at their next sign-in under Security settings.
3. Agents cannot set or read out a PIN for the customer.

Questions go to your Tier 2 supervisor.

A handwritten signature in black ink, consisting of a series of loops and a trailing line.
